Hi Kim,

Thank you for the help last week on the summary of EPA comments. I attached the updated version for your info only.

We also need to be able to say how we are addressing issues. For example, "If you didn't properly do the gamma scans, how can you know where the contamination is? How are you going to satisfy the ROD requirement that no rad contamination will remain above the cleanup goal? How are you going to prove that HH&E are protected?"

Is there a way to generally explain how we are addressing the allegations and unknowns? Can you please prepare a summary?

Thank you, Derek

I am working on the summary list of EPA comments now and our responses now. Should be ready soon.

What do you guys have in your notes on what Lawrence wanted for this writeup?

In addition to a summary of EPA comments and how we're addressing them, I also heard him ask for Workplan elements and to frame the background plan.

I am looking at this now and will take a crack at the next iteration, unless you are already making changes. Let me know.

Whoops, I see that I already have it. I'm working from home and a slug of email just loaded.

Hi Kim, please send the draft to Derek, Thomas and I when you are completed. Be sure to include the data quality issues identified by ORAU. Thanks, Pat
